Alltrucks is continuing to grow and welcomes the 700th partner in the Europe-wide network

The Alltrucks Truck & Trailer Service network is growing continuously and is expanding its presence in now 12 European countries. Alltrucks welcomes NTB Nutzfahrzeuge Technik Brandenburg GmbH from Blankenfelde-Mahlow as its 700th partner. This company now benefits from the comprehensive multi-brand services as well.

Munich. Since its launch in 2014, the multi-brand, full-service workshop concept "Alltrucks Truck & Trailer Service" has been recording continuously high demand and constant growth throughout Europe. The Alltrucks network now consists of a total of 700 partner workshops in Germany, Austria, Switzerland, the Netherlands, Belgium, Luxembourg, France, Spain, Portugal, Italy, Poland and Norway.

Despite the difficult circumstances caused by the corona pandemic, ten new partner workshops joined the network in Germany alone in the first half of this year. Among them is NTB Nutzfahrzeuge Technik Brandenburg GmbH in Blankenfelde-Mahlow near Berlin. The multi-brand workshop was newly built in 2019 and joined the Alltrucks workshop network right at the beginning of this year. On a total of 10,000 sqm, seven employees service and repair all types of commercial vehicles, from tractors to trailers and semi-trailers. NTB Nutzfahrzeuge Technik Brandenburg GmbH is also a service partner of Krone and GFA Gothaer Fahrzeugachsen.

Thilo Block, operations manager of NTB Nutzfahrzeuge Technik Brandenburg GmbH, is convinced about joining Alltrucks: "As a professional multi-brand company, we decided to start with Alltrucks as a strong partner on our side. Through this partnership we are ensuring a significant know-how advantage for our workshop. We want to be able to serve every customer at the same high level, regardless of the brands of their vehicles. We are using the combined knowledge and long-term experience of Bosch, Knorr-Bremse and ZF in order to remain competitive in the long term."

Successful partnership also for end customers

The commercial vehicle workshop is ideally located in the south of Berlin on the A10 Autobahn at the Rangsdorf exit. The company's customers include the internationally active Laa Trans Logistic with 70 units, which has already benefited directly from the Alltrucks partnership of NTB Nutzfahrzeuge Technik Brandenburg GmbH. As part of Alltrucks Fleet, the European service offer for fleets, a truck of Laa Trans Logistic was repaired quickly, without any complications and without substantial additional costs at a local Alltrucks partner workshop after an accident in Barcelona at the beginning of the year.

"Thanks to the effective coordination work carried out by Alltrucks and our partner workshop Nirvauto vallès near Barcelona, our Alltrucks Fleet customer has saved a lot of time, money and headaches", expresses Thilo Block's great satisfaction with the Alltrucks Fleet Service. "We want to continue to be there for our customers in exactly the same way in the future, true to our motto: everything from a single source at a professional level, for all brands for trucks and everything that is being pulled on the back".

In addition to the bundled technical multi-brand competence, Alltrucks offers its partners access to exclusive services and professional marketing support. At the same time, system consultants ensure intensive personal support. The workshop concept is continuously expanding its range of services and products, most recently with important new cooperation partners such as Prometeon, Maha and C-ECO.

ALLTRUCKS TRUCK & TRAILER SERVICE

Alltrucks GmbH & Co. KG was founded as a joint venture by the three leading automotive and commercial vehicle suppliers Bosch, Knorr-Bremse and ZF in 2013. Under the Alltrucks Truck & Trailer brand it offers commercial vehicle workshops a wide range of services in maintaining and repairing light to heavy commercial vehicles, trailers and semitrailers – across all brands. These services include multi-brand vehicle diagnostics, a technical hotline, customised training courses, technical information, a 24/7 service, marketing support and professional quality management. The system headquarters based in Munich is continuously expanding its portfolio, including new cooperation programmes and fleet services – in the medium term throughout Europe.
